BALE RÜNNER

"Simple, quick, and efficient"

Availability

To ensure delivery for the 2026 season, orders need to be lodged as soon as possible to ensure materials are available.

As the roller tubes are a special rolling for Cotton Equipment by the steel mills with a 3 month plus delivery period, I need to secure your order rapidly to ensure March delivery. Placement of your order is a priority.

What Our Customers Say

"It takes the pain, stress and worry out of collecting the bales. After picking for a week we start using the Bale Runner trailer with one employee looking after two to three pickers. It's now one part of the picking process I no longer have to worry about."

"Carrying more bales per trip meant our tractor only spent half the amount of time travelling and half the time in the cotton stalks. It was also a way to get the bales off the paddock as quick as possible, avoiding rain and extra compaction when wet. We carried approximately 300 bales per day and didn't break a single bale, overall achieving an approximate saving of 35% per bale on handling costs by using the Bale Runner"

- Reardon Farms, Goondiwindi

391 bales collected in 14 hours

264 bales in 7 hours

Averaging 30 Rolled Bales per Hour
